

Southwest Washington Science and engineering fair

Science fair rules can be confusing. Students and teachers need to read them carefully by going to the ISEF website. All projects must be approved for safety before actual experimentation or testing begins. This fair will hold safety approval committee meetings regularly to help entrants, or a school can set up their own committee following the guidelines. Please contact the director with any questions.

An open competition for all high school students to exhibit their research and design projects, conducted under the rules of the Intel International Science and Engineering Fair.

Students from Clark, Cowlitz, Skamania, Wahkiakum and Pacific counties are eligible and encouraged to enter.
